Subject: SDG Blockchain - Capacity Building

Dear Colleagues

As part of a global initiative, the UNDP Mauritius Country Office has been selected to participate in the **SDG Blockchain Accelerator – Cohort 1**. This programme is led by **UNDP AltFinLab**, with the **Blockchain for Good Alliance (BGA)** as Ecosystem Coordinator and **EMURGO Labs** as Technical Lead Partner.

In our role as a Challenge Owner, we will collaborate with a matched Blockchain Solution Maker to pilot a **decentralized crowdfunding solution for solar energy in Mauritius**, starting with public schools. This initiative aims to co-develop innovative blockchain-based solutions aligned with the **Sustainable Development Goals (SDGs)**.

To support this effort, a dedicated communication channel has been established for the capacity building of the Solution Maker team, responsible for our project. We have been informed that **government counterparts are also welcome to join** freely for skills development. If interested, kindly share the contact details of relevant technical staff who would like to be part of this exciting initiative.

Regards

**Vichittra Purdassee**
