Subject: RE: Partnership Opportunity for Anticipatory Action Accelerator Program

You don't often get email from [@ug-actionagainsthunger.org](#). [Learn why this is important](#)

Dear Zainab,

Thanks for sharing all the information after the meeting.

As I mentioned to you yesterday, we are happy to participate in any way as we're more than happy to bid for this opportunity. We also appreciate the terms (scope of work) and what is allocated. We will achieve a lot of knowledge and experience by being part of this endeavor should we win and implement together with you.

We have decided (tentatively) to target Kasese. We will narrow it down to the parish and village levels. I now have the focal point person for this location in copy @Micheal Ainembabazi

Regarding partners, we will work with *Kiima Foods* as a key implementation partner (they are currently doing some AA with WWF). We can conclude by increasing (including how to map them out strategically) the number of local partners, including an INGO called BRAC, if acceptable, which is present. We have been discussing the possibility of working together in the future. Since we are present in the district and have been working in partnership with other actors, we can easily have many more for your indicated purpose. We may need some guidance here.

I am also inquiring whether having a department of the local government within which the AA docket falls would be a great idea, given that we are enhancing the efficiency and speed of coordinated anticipatory action.

Paul ONYAIT
